

Serial No.: 09/888,515

IN THE CLAIMS:

1. (Currently Amended) A photoelectric cell

~~comprising~~

~~a photoreceptor circuit~~

~~comprising~~ a photoreceptor component

photoreceptor area

~~receiving a spot of light~~

~~a switch for receiving the light~~

~~wherein the photoreceptor component is~~

~~the photoreceptor surface~~

~~comprising~~ two juxtaposed photoreceptor areas

~~these areas each having~~ microelectronic

~~circuits~~

~~wherein the first photoreceptor area~~

~~operates in a reflex operating mode~~

~~wherein~~

~~the first photoreceptor area~~

~~operates a variable~~ a first output

~~operating~~ in the reflex operating mode,

Serial No.: 09/888,515

- the second area _____
_____ analog detection of position of _____ spot of
light _____ a second output _____
_____ in the proximity operating mode _____

[The page contains faint horizontal lines and illegible markings.]

2. (Cancelled)

3. (Currently Amended) The cell according to claim 1, the two electrodes both have a common cathode areas have a common cathode.
